# SNAPSCAN EZ

## It's a little wonder

SnapScan EZ sees more than a billion colors! You get vivid hues with plenty of detail in shadows and highlights. The lift-off lid means you're not restricted to thin sheets; you can also capture this massive color range from books and other 3D objects.

## Sharp, fast and simple

SnapScan EZ captures impressively sharp images from photos, artwork, magazines or books up to A4 size (11.7" x 8.5"). Within seconds you have a full-color preview of your original. Agfa FotoLook handles all of the professional-level settings for you, so scanning is extremely easy. Color and contrast are precisely controlled, blurred images can be sharpened and dots removed from printed matter. Captured images are immediately ready to go into your school projects, greeting cards, newsletters, slide presentations or even Web pages on the Internet.

## Clever reader

Besides scanning images, SnapScan EZ also includes OmniPage OCR software, which reads documents, magazines or books.

It converts the text into editable files for use in word-processors or databases. This feature will save you hours of retyping printed text.

## Scanner software on CD-ROM:

- Scanner driver software (FotoLook & FotoSnap)
- Image editing software  
Ulead iPhoto Express (WIN 95 + NT)
- Text scanning software (Caere OmniPage Limited Edition for PC)
- Scanned document management software (Visioneer PaperPort)

## A real bonus

The supplied PaperPort software turns SnapScan EZ into a document management system for scanning, editing, filing, faxing and copying. Your modem becomes a "real" fax machine, capable of transmitting copies of documents or books. And your b/w or color printer is converted to a copying machine!

## EZ connections

Connecting SnapScan EZ to your PC is child's play. Just plug it straight into your standard printer port and you're ready to scan. You can still hook up your other parallel devices via a connector on SnapScan EZ. Our unique OptiSpeed module automatically adjusts SnapScan to match your computer's maximum input speed. And talking of child's play, the new soft-touch on/off power button is irresistible!

## Have some fun!

So that you too can add some foliage to your features, give yourself a halo, or even shake hands with your movie idols, we've included iPhoto Express image manipulation software. Let your imagination grow wild - give everyone something to smile about!

**SnapScan EZ is the fast and inexpensive route to success!**

## • Scanner type:

One pass, desktop, CCD flatbed

## • Maximum resolution:

600 (H) x 1200 (V) ppi, optical  
9600 (H) x 9600 (V) ppi through interpolation

## • Internal sample depth:

10 bits for grey  
30 bits for color

## • CCD:

Color coated, 5100 elements

## • Scanning speed:

Grey: ≤ 3 ms/line  
Color: ≤ 8 ms/line

## • Scanning area:

Maximum 216 x 297 mm  
(8.5" x 11.7")

## • Lamp:

Cold cathode

## • Interface:

Parallel port, 2 x 25 pins connector

## • Transmission speed:

Maximum 1 MB/seconds  
OptiSpeed™ for superior performance on PC

## • Power supply:

Line voltage: 115 V  
Frequency: 60 Hz

## • Power consumption:

≤ 15 W

## • Dimensions:

445 mm x 330 mm x 105 mm  
(17.5" x 13" x 4.1") (L x W x H)

## • Environment:

Operating temperature: 50 °F to 104 °F  
Relative humidity: 20% to 85%

## • Minimum requirements:

Pentium processor  
Windows 95
