At the heart of the BJ-W9000 is its superior image quality. Canon raises the wide-format standard with its new and exclusive MicroFine Droplet Technology printing in true 1200 dpi (1200 x 600) for all print modes—high speed, normal and high quality. Also as a result from utilizing a 6-color system, the output from Canon's Cyan, Magenta, Yellow, Black, Photo Cyan and Photo Magenta ink rivals even the silver halide photo process.

What's most astonishing is that the BJ-W9000 has the capability to print up to 92 sq. ft. per hour at 1200 dpi. With the BJ-W9000 heads dispersing ink from a total of 512 nozzles per color (totaling 3,072 nozzles), the printer is able to discharge ink over a larger area in less time.

The unattended printing capabilities of the BJ-W9000, with the large-capacity ink system and the dual-roll media paper-handling, enable the BJ-W9000 to work as hard as you do. With the BJ-W9000, you'll have the ability to satisfy all of your current needs—and more.
