## ColorSpan Print Servers

ColorSpan's print servers are tremendous productivity tools designed for HiRes 8-Color printing. Our servers are easy-to-use and provide fast, reliable file processing. Our built-in ColorMark® color management system produces accurate color reproduction. And the graphical user interface puts you in control of print jobs by allowing you to manage your workflow. ColorSpan servers include several productivity features to make printing fast and efficient.

The ColorMark® Pro 4000 Print Server is the solution for all your digital color printing needs—from Big Color® wide-format prints to desktop film separations. Powered by a 400 MHz processor, the ColorMark Pro 4000 provides fast, reliable file processing for your entire network of Macintosh® and PC workstations.

### Features:

**Page Description Language** — PostScript Language Level 2 compatible. **Network Connectivity** — 10/100BaseTX Ethernet Interface. Supports EtherTalk, TCP/IP, Novell Netware, and Microsoft Windows Network protocols. **Color Management** — ColorMark Color Management System for accurate color matching standards: supports TruMatch® Color Swatching System. **ColorMark Calibrator** — Feeds data to Color Management System for automatic color compensation based on current operating conditions. **MediaSaver™** — Optimizes media usage by interactively

arranging multiple RIP Saver documents. **Preview Screen** — Displays your file on the monitor as it will appear when printed. **RIP Saver™** — Users can save and store processed files internally or externally, for temporary or permanent storage. **File Spooling** — Multiple users can spool jobs simultaneously. **Job Logging** — Automatically records RIP times and supplies used, crucial for billing purposes. **User Interface** — Color monitor, keyboard, mouse and graphical user interface. **Downloader utility** — Macintosh and Windows applications that allow direct downloading of PostScript, TIFF, EPS, or Photo CD files.

## ColorMark® Pro 4000 Print Server

ColorSpan has replaced the ColorMark® Pro 3000 and RIPStation™ 266 print servers with the new ColorMark Pro 4000 and RIPStation 300 print servers. The new print servers offer increased processing power and memory over their respective predecessors. Below is a comparison of the products.

---

## RIPStation/RIPStation-L Print Server

The RIPStation is a cost-effective, dedicated print server designed for single printer connectivity. It provides fast, 200 MHz file processing, ColorMark® color management system and several productivity features. When used with the ColorMark® Calibrator, you get accurate, consistent color—print after print.

The RIPStation-L print server supports the DisplayMaker-L printer series. It provides the same 200 MHz file processing and single-printer connectivity, but has some limited features. It is upgradable to include full functionality and the ColorMark® Calibrator. Ask your sales consultant for details.

## **DisplayMaker HiRes 8-Color Series 200**

Embedded PostScript® RIP hardware and software set

- Processor: 266 MHz, Level 3, 64-bit Superscalar Processor
- Memory: 64 MB of memory
- Hard Drive: 4 GB
- Network connectivity with 100baseTX, 10BaseT, and Ethernet Interfaces

---

## **DisplayMaker Multiple RIP Options**

Open-ended Architecture makes ColorSpan's DisplayMaker HiRes 8-Color Series

and Giclée PrintMakerFA compatible with 3rd party RIPs such as:

- Onyx Graphics
- ScanVec
- Image Technologies Developments

---
