

# LVT RHINO+ IMAGE RECORDER

## HIGH RESOLUTION IMAGE RECORDER

Technical Data

February 3, 2000

### CONNECTION TO HOST COMPUTER

- ▲ A 25 foot, 10/100 Base2 Ethernet cable is supplied

### INT'L SAFETY APPROVALS AND CERTIFICATIONS

- ▲ CE, ETL, ETLIC, FCC and UL

### RECOMMENDED HOST SYSTEM

- ▲ Intel Pentium based computer, 400 MHz (200 MHz min)

### RECOMMENDED HOST CONFIGURATIONS

- ▲ 128 MB RAM (64 MB min.)
- ▲ 1.0 GB IDE/SCSI hard disk (for operating system)
- ▲ 6 GB SCSI hard disk (for image files, ect.) 1GB min.
- ▲ 100 Base-T, RJ-45 Connection Between Host and Recorder
- ▲ 10/100 Base T-ethernet card (for internal work)
- ▲ 12x IDE/SCSI CD-Rom
- ▲ 3.5 inch floppy disk drive
- ▲ 2 serial COM ports
- ▲ 24-Bit video card
- ▲ Monitor with at least 1024 x 768 resolution
- ▲ Operating System software
  - Microsoft Windows NT 4.0 server software
  - LVT operating software

### LVT OPERATING SYSTEM

- ▲ LVT Operating software has an intuitive, graphical user interface, with toolbox and menu bar, and accepts digital images in a variety of common formats. The software allows users to preview, format, scale, resample, and output multiple images to the entire line of high-resolution LVT Image Recorders

### IMAGE LAYOUT

- ▲ Open layout tools handle any number of images, and allow the precise control of placement, size, overlap, scale and cropping of each one. Quick rotation is supported in 90 degree increments. Custom layouts, including background colors, can be saved as templates.

### IMAGE SCALING AND RESAMPLING

- ▲ Scaling individual images may be done as a percentage in a dialog box (0-100 in .001 increments), or with a "snap to window" command. Two models of interpolation are available and occur in real time during output

### INPUT FILE FORMATS

- ▲ RGB TIFF
- ▲ Photo CD Image Pac
- ▲ LV3 format files
