HiRESOLVE 8000

8000 True Optical dpi

With industry leading optical resolution capabilities, the Howtek HiResolve 8000 matches maximum resolutions up to 32,000 dpi.

100MB scan <4 min

With speeds up to 1,600 rpms, the Howtek HiResolve 8000 beats all previous benchmarks for maximum productivity.

48 bits of Color

With more than 16 million shades of color to work with, you can make good images great and bad images good.

Dynamic Range of 4.2

Gives you full flexibility to work with reflectives and transparencies without compromising your range of detail in shadow areas.

Trident Photo Edition

Included with the HiResolve 8000, this Common Workflow Interface™ connects directly to any of your Howtek scanners. Trident increases productivity by supporting saved 8, 12, or 16 bit TIFF images with cross platform support on Macintosh or Windows 95 and NT.

HOWTEK'S HiResolve 8000 introduces a new benchmark in quality, versatility and time saving features.

Quality The Howtek HiResolve 8000 scanner offers up to 8,000 dpi of true, optical resolution; unprecedented in the industry today. And with 17 different apertures available, you are nearly guaranteed to scan at a native resolution every time, without interpolation. **Time** With scanning speeds up to 1,600 rpms and interactive batch processing through Trident software, increase your overall productivity by setting up and scanning images at the same time. Trident Photo Edition, bundled with all Howtek scanners, offers enhanced auto-intelligence features to interactively select highlight and shadow points and correct for color cast. This combination produces the 30-second scan by reducing the number of steps to complete a scan. **Flexibility** Whatever your original image may be; from positives to negatives, small 35mm's to large transparencies, photographs or previously printed images, the Howtek HiResolve scanners offer a full dynamic range and 48 bit color space giving you more color to paint you image with. Working on Macintosh or Windows 95 and NT platforms, Howtek HiResolve and Trident have got you covered.
