

Are your scans **Phat** enough...

ScanMate™ F10

HiResolve™ 8000

Howtek PhatScan™ technology gives you...

- up to 8000 dpi (True Optical Resolution)
- scanning speeds up to 1600 rpms
- poster size optical scans up to 200 MB
- optical enlargements up to 4444%
- scanning area up to 24" x 18.5"
- grain-busting software optimization
- drum quality, flatbed flexibility

to print 2.6 Billion Dots on one page - blow up a slide to cover the side of a BUS!

to capture a full gamut of color and take advantage of your 6, 8 even 12 ink printer - now you can capture and print great detail in your shadows!

to increase your overall productivity - never send out another scan!

This is where other scanners just can't cut-it. You need to create **PhatScans™** to print the *phattest* images on your wide format printer. Simply, more image information at a great price!

NOW is the time! Howtek is offering a **Phat Deal**; up to 8.8 Billion addressable points, true 8,000 dpi resolution, wide format printer profiling, and a full dynamic range of 0-4.2 OD. That's right, and now **for a limited time only*, just for owning a wide format printer, you can get up to **\$2000 back!** Act within 30 days of the postmark date to take advantage of this **Phat Deal!**

So hurry! If your wide format printer needs a **PhatScan™**, don't miss this rare opportunity to save big. Contact your local Howtek dealer, or
