

# Scanning Application for the Scanmaster™ 2500 and Scanmaster 4500 RGB

Featuring ColorBlind™ Color  
Management System

## 2500 FEATURES

- Dynamic batch capability for simultaneous scanning and set-up
- Pre-defined menu settings automatically adjust for various output requirements
- Bundled Color Management System allows for CMYK output (Macintosh® only)
- Quick and easy scanning of same media without loss of productivity
- Multi-level controls for quality results at any experience level
- Line art threshold for 1-bit per pixel data for black and white scanning
- Easy to use settings for conversion of four-color originals for grayscale output
- Customized profiling available through ColorBlind for device-specific output requirements
- Macintosh or PC platform

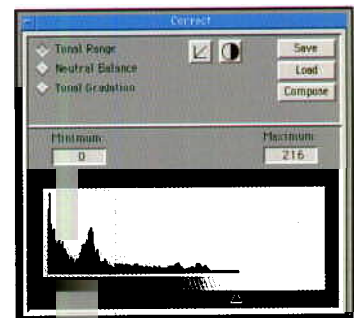

## 4500 FEATURES

### Includes all 2500 features plus:

- Dynamic batch capability of mixed media for simultaneous scanning and set-up
- Interactive focus for visual adjustment on the monitor
- Automatic or manual focus/defocus of images for optimal image quality control

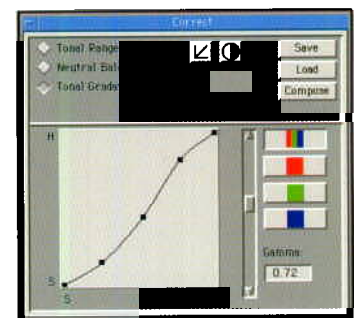

*The Tonal Range histogram displays image detail. The automatic Auto Range button allows users to quickly and accurately define highlight and shadow parameters.*

*For difficult originals operators have the option of manipulating the highlight and shadow manually with the eye dropper or sliders.*

*Precise color correction is easily achieved by adjusting the five point Tonal Gradation curve.*

*This can be done by manipulating the R,G,B curves or gamma controls. The tonal gradation curves may then be saved as a custom look up table (lut) for specific output conditions.*
