

QCS 3200

Sometimes it's better to take things lying down. Especially when convenience is a priority. The imapro QCS-3200 flatbed scanner proves that point by delivering quality comparable to drum scanning with the convenience of a large-format flatbed. If you need commercial lab-quality one-pass scanning with ease of use built in, the QCS-3200 is standing by. Slap down an image and fire away. imapro's unique optical feedback and 12-bit dark correction ensure consistent colour fidelity for each separate colour, and density values are set automatically. And for enhanced lab productivity, the large format of the QCS-3200 makes batch scanning a snap. Now you do your best work lying down.

QCS 4100

Scanning to the beat of a different drum! Welcome to the QCS-4100, imapro's 36-bit asynchronous drum scanner offering the features and quality of expensive drum scanners in an affordable package. Images roll onto the QCS-4100 at the easy-load mounting station, either as single images or as groups for batch scanning. Then select a resolution up to 4000 dpi, and stand by for the best images in town! If you need drum scan quality at half the usual cost, the QCS-4100 is ready to roll.

QCS 4500

Commercial photographic labs need more than just high-resolution scans – they need scanners that give them maximum flexibility of both input and output. Introducing the QCS-4500, our top-of-the-line drum scanner offering all the features of the QCS-4100 and accepting large-format originals. The QCS-4500 is capable of scanning original images up to 11" x 11.8". Big, fast and powerful, imapro's QCS-4500 delivers stunning colour and professional quality images every time. If you're looking for a stand-alone high-end scanner easily integrated into your commercial photolab, the QCS-4500 is it.

Imapro Scanner Specifications

	QCS-4100
Maximum Resolution	4000ppi
Maximum Original	6"x8"
Media Carrier	Removable Drum
Sensor	3 Photomultiplier Tubes
Dynamic Range	0-3.8D
Original	Transparency, Negative or Reflective
Light Source-Reflective	Tungsten Halogen Lamp
Light Source-Transparency	Tungsten Halogen Lamp
Interface	SCSI
Power Supply	AC100-240V 50/60Hz
Power Consumption	Maximum 360 Watts
Host Operating System	Windows, Windows NT, Mac
Driver Software Included	WinScan
Weight	60lbs, 27.3Kg
Dimensions	25"x10"x15", 64x25x38cm
Scan Method	One Pass
Look Up Table	12 Bits Per Color
Data Format	24bit TIFF
Focus	Automatic/Manual in Software
Aperture	10 Settings, Automatic
