

KODAK PROFESSIONAL PHOTO CD CS200 Authoring Kit

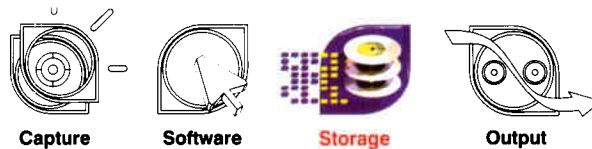

Low-cost, high-quality image archiving made easy.

The demand to use images in projects of all kinds is up, way up. So is the need to archive these valuable image assets for future projects. And all of this has to be accomplished efficiently in order to keep operating costs down.

The KODAK PROFESSIONAL PHOTO CD CS200 Authoring Kit is a moderately-priced, open system that enables users to convert valuable image assets to PHOTO CD (IMAGE PAC), FLASHPIX™, JPEG, or TIFF RGB file formats. The CS200 Kit makes it easier for people to use images in the PHOTO CD IMAGE PAC™ format, which is widely accepted as an industry standard for archiving and re-purposing high-quality images. Images can come from sources such as digital cameras, film scanners and print scanners.

The system allows for scanning images to either an archivable storage medium (Portfolio II and FLASHPIX CD's) or to a network storage device. Therefore, in-house graphics departments, newspapers, universities, and professional photographers can inexpensively archive valuable digital images onto PHOTO CD's.

This is a system based on the MACINTOSH Computer, so it's both user-friendly and extremely flexible. The CS200 Kit enables businesses to author PHOTO CD's from sources such as the KODAK PROFESSIONAL DCS 410 Digital Camera and the KODAK PROFESSIONAL RFS 3570 Film Scanner using an ADOBE PHOTOSHOP plug-in interface.

Computer not included.

Kodak Professional

Features

- Authors PHOTO CD IMAGE PAC, FLASHPIX, JPEG, and TIFF RGB file formats.
- Stores images to Portfolio II or FLASHPIX CD's, networked storage devices or to the hard drive.
- IMAGE PAC format - industry standard for archiving and re-purposing images.
- Enhances the capability of an existing POWER MACINTOSH Computer.
- Easily integrates KODAK Digital Cameras and Scanners.
- Easy-to-use software requires minimal training.

Configuration**Hardware**

- KODAK PCD Writer 240; 2X writer, 4X reader; multi-session PHOTO CD capable
- KODAK IMAGE MAGIC Print Scanner 2000; resolution up to 600 dpi; 32-bit color (optional)
- SCSI driver board
- SCSI cable(s)

Software

- KODAK CS200 Application
- KODAK DIGITAL SCIENCE™ Arrange-and Build-It Portfolio
- ASTARTE CD Toast

Minimum System Requirements

- POWER MACINTOSH 8500 (PCI systems only)
- 112 MB DRAM
- Internal 1 GB hard disk
- Internal 4X CD-ROM drive
- A 17" (43.2 cm) monitor with 2 MB VRAM
- MACINTOSH OS 7.5.5

Site Specifications**Electrical**

- 100-120 V AC, 60 Hz, 15A, single phase, dedicated line preferred.

Ambient Temperature/Humidity

- 59°-86°F (15°-30°C)/15%-76%RH, non-condensing.

Regulatory Approvals**Safety**

- UL 1950, CSA 950, TUV GS, EN 60950, IEC 950

Emissions

- FCC Part 15, Class A; ICES Class A; CE; VCCI Class 1
