

PRODUCT Description and Specifications

See reverse side for list of kit components.

KODAK DIGITAL SCIENCE™ Conversion System 1200 Kit

High-speed, high-quality scanning made simple.

The demand to use images in projects of all kinds is up, way up. So is the pressure to reduce the cycle time and costs of creating high-quality and versatile digital images.

The innovative KODAK DIGITAL SCIENCE Conversion System 1200 Kit is a great way to expand the capabilities of your POWER MACINTOSH computer. Here is a moderately priced system that lets you quickly and easily convert negatives and slides to either a Photo CD or TIFF RGB format.

For much less than you thought possible.

This advanced system can scan over 100 color negative images per hour, keeping both costs and turnaround times at record lows—as output and profitability soar to new highs.

In-house graphic departments that use the KODAK CS 1200 Kit can improve workflows with quick, high-quality conversions. Fast, on-screen editing helps newspapers and magazines beat deadlines and cut costs. And the CS 1200 Kit lets retail operations offer their customers new and profitable digital services.

digital science™

KODAK DIGITAL SCIENCE™ Conversion System 1200 Kit

The heart of the kit is the fast and powerful KODAK PCD Film Scanner 1000. With it, you can digitize 35 mm negatives and slides *in a matter of seconds*, creating an image file containing some 18 million pixels of information.

The KODAK CS 1200 Kit is MACINTOSH-based, so it's both user friendly and extremely flexible. It can digitize images from such sources as KODAK DIGITAL SCIENCE Professional DCS 420 and

460 Digital Cameras and KODAK Professional RFS 2035 Plus and 3570 Film Scanners using an ADOBE PHOTOSHOP plug-in interface.

The operator interface and integrated system design of the KODAK CS 1200 Application Software maximizes productivity. All scanning, compressing, and writing functions are performed in parallel. The digitized image data file can be sent to any device on the system's network or to any archivable storage medium.

System Benefits:

- Designed to easily integrate with your POWER MACINTOSH computer to maximize your productivity.
- Scans images in a cross-platform format to a network or to an archivable storage medium (Portfolio CD).
- Long file name capability permits better descriptions and improved indexing/retrieval.

Components

Hardware

- KODAK PCD Film Scanner 1000; accepts 35 mm filmstrips (2 to 40 frames) and mounted slides
- KODAK PCD Writer 225/240; 2X writer, 4X reader; multi-session Photo CD capable
- SCSI driver board
- KODAK Image Accelerator Board (NuBus Kit only)
- SCSI 2 to SCSI 2 (68 position) cable

Software

- KODAK CS 1200 Application Software

Options

- KODAK PCD 1000 Slide Tray Accessory Kit
- KODAK PCD 1000 Slide Tray

Minimum System Requirements

- POWER MACINTOSH 8100/80 Mhz (NuBus) or 8500/120 Mhz (PCI)
- 112 MB DRAM
- Internal 1 GB hard disk
- 2 MB VRAM (16.7 million colors on 17" [43.2 cm] monitor)
- Internal 2x CD-ROM drive
- MACINTOSH OS 7.5.1

Site Specifications

Electrical

- 100-120 V AC, 60 Hz, 15 A, single phase, dedicated line preferred

Ambient Temperature/Humidity

59°-86°F (15°-30°C)/15%-76% RH, non-condensing

Regulatory Approvals

Safety

- UL 1950, CSA 950, TUV GS, EN 60950, IEC 950

Emissions

- FCC Part 15, Class A; ICES, Class A; CE; VCCI, Class 1

Immunity

- EN 50082-1

CAT No. Description

811-6956	KODAK DIGITAL SCIENCE Conversion System 1200 Kit with Slide Tray Accessory (for use with PCI MACINTOSH System)
844-8284	KODAK DIGITAL SCIENCE Conversion System 1200 Kit without Slide Tray Accessory (for use with PCI MACINTOSH System)
123-4525	KODAK DIGITAL SCIENCE Conversion System 1200 Kit with Slide Tray Accessory (for use with NuBus architecture MACINTOSH System)
166-7419	KODAK DIGITAL SCIENCE Conversion System 1200 PCI Kit without Slide Tray Accessory (for use with NuBus architecture MACINTOSH System)
124-4052	KODAK PCD 1000 Slide Tray Accessory Kit
854-3803	KODAK PCD 1000 Slide Tray
