KODAK PROFESSIONAL DCS 520
Digital Camera

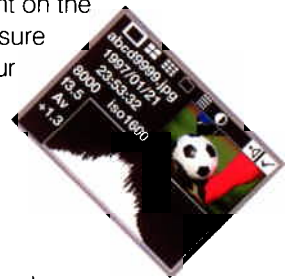

The digital camera for non-believers.

- » Rapid burst rate. 6 MB image files. ISO 200-1600.
- » See your images in the camera's color LCD, right after they're captured.
- » Like using an SLR, so the learning curve is easy.
- » Wire images around the world without waiting for processing.

If you need images that look great when the odds are against you—low-light, fast-action, short deadlines—this camera is for you.

The KODAK PROFESSIONAL DCS 520 Digital Camera elegantly combines the three attributes that you need the most: high ISO (200–1600), 6 MB image files, and a rapid burst rate. It lets you capture up to 3.5 images per second. So it's easy to capture multiple images and have them look great—whether you're shooting outdoors or indoors.

The DCS 520 Digital Camera lets you instantly analyze your images right on the LCD panel with the Kodak-developed histogram and highlighted exposure features. Then you can transmit them quickly, all over the world from your laptop computer. Yet, with all these digital conveniences, you won't feel like you're learning about a whole new camera. This camera is a digital SLR built around the CANON EOS Camera subsystem. And, because there's no image sensor framing, what you see really is what you get.

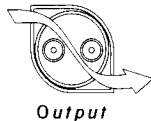

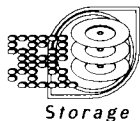

Improved image quality. The auto white balance, calibrated through-the-lens (TTL) flash, and anti-aliasing technologies work together to give you unbelievably crisp images. New charge-coupled device (CCD) technology allows you to capture 2 mega-pixel images giving you improved color quality in your digital images.

Improved digital performance. The DCS 520 Digital Camera lets you produce superior digital images without trading off ISO speeds or camera burst rates. It allows you to capture up to 12 continuous images before the buffer is filled and downloaded to the PC Card. Simply shoot and view. It's that simple.

Powerful user-friendly replaceable batteries. No need to plug the camera into an external power source or tether it to a computer. Its powerful on-board battery lets you capture up to 300 images, wherever you go, indoors or out. Need a fresh battery in the middle of an event? Simply pop open the door, slide out the battery, and slide in a fresh one.

Color LCD Image Analysis. The LCD allows you to navigate through all camera functions, including image review, image tagging, voice recording, and digital camera controls.

Kodak Professional

Take Pictures. Further.™

KODAK PROFESSIONAL DCS 520 Digital Camera

Features

- CANON EOS Camera subsystem
- Full image viewfinder WYSIWYG
- Dual PCMCIA slots, Type I, II, III
- Removable and rechargeable Nicad battery with dual slot charger included
- Color LCD for image analysis
- Calibrated TTL flash ready
- IEEE 1394 high-speed serial interface (future release for PC)
- 12-bit dynamic range
- Internal microphone for voice recording

Hardware Requirements

PC

- WINDOWS 95 or WINDOWS NT 4.0 system
- 133 MHz PENTIUM Processor or greater
- 64 MB RAM minimum, 128 MB RAM recommended
- IEEE 1394 PCI connector and/or adapter cards and/or PC Card peripheral device

MACINTOSH

- MACINTOSH OS 7.6.1 or greater
- Power PC Processor
- 64 MB RAM minimum, 128 MB RAM recommended
- IEEE 1394 interface and/or adapter cards and/or PC Card peripheral device

Software Requirements

PC

- KODAK PROFESSIONAL DCS TWAIN Module v5.0 or greater, for ADOBE PHOTOSHOP v4.0 or greater
- Other TWAIN compatible applications

MACINTOSH

- KODAK PROFESSIONAL DCS Acquire Module v5.0 or greater, for ADOBE PHOTOSHOP v4.0 or greater
- ADOBE PHOTOSHOP v4.0 or greater, compatible import plug-in

Specifications

- ISO range: 200-1600
- Battery life of up to 300 shots or unlimited number with AC battery adapter/charger

- Bit Depth: 36-bit color (12 bits per color) original capture
- Burst rate: 3.5 f/sec, min. 12 frames buffered before disc write
- CCD Size: 1152 W x 1728 H pixels
- Size: 174 mm tall, 161 mm wide, 92 mm deep
- Weight: 1.65 kg without battery, lens, and PC Card
- Conforms to FCC Class B, CE Mark
- Class B Declaration, VCCI Class 2 Certified

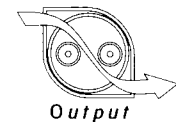

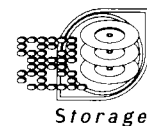

Specifications are subject to change without notice.
