SmartPro™ 4x5 Camera Back

The SmartPro 4x5 camera back is ideally suited for commercial photo labs and service bureaus. It produces high quality images for extremely detailed prints, posters, and enlargements. The SmartPro 4x5 is an intelligent camera back specifically designed for use with the LFR series film recorders. This camera is highly automated and includes a 16-character liquid crystal display that provides camera and film recorder status information.

Format

- Standard 4x5 sheet film.

Exposures

- 2 exposures per 4x5 film holder.

Compatibility

- LFR Mark III, LFR Mark V, and LFR Mark VI Digital Photography Models.
- Standard Mark III desktop digital film recorder.

Pin Registered

- N/A

Lens

- 115mm @ F5.0 - lens is computer focused for optimum image clarity.
- 120mm @ F5.6 Schneider Kreuznach lens (LFR Mark V and LFR Mark VI only).

Features

- Camera operates only when film is properly loaded.
- Retains valid status information with power off or when disconnected from film Recorder.

Film Types

- Wide variety of custom film look-up tables for various Kodak and Fuji films.
