

Overlay Plugin for *Packagizer*™

accessory software for graphic overlays

a Plug-In Systems product

Automatic Overlays

automatic overlays

simple operation

Composite images are one of the greatest benefits of digital imaging, and with today's powerful image-editing programs, almost any manipulation is possible. The time consuming processing, and the requirement of trained operators often makes these effects cost prohibitive. The Overlay Plugin eliminates operator involvement in image editing applications and allows single click application of graphics to the package printing process. Simply select a predefined overlay graphic and have it applied to your prints automatically.

Customize your overlays

sports cards

magazine covers

watermarks

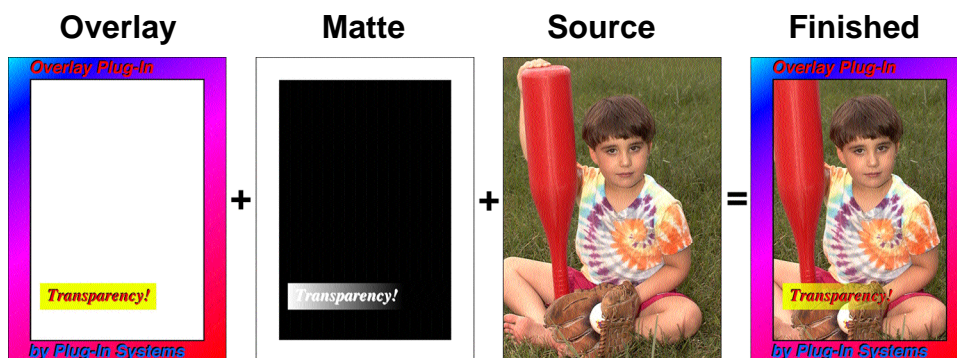

special events

The Overlay Plugin uses standard TIFF files, so you can create any graphic overlay you want with any image-editing software such as Photoshop. This provides the flexibility needed to make trading cards, magazine covers, special event commemoratives or to add watermarks, copyright notices or reorder information to the finished print. You can start with clip art or commercial overlays, or you can build your own from scratch. The possibilities are endless. The Overlay Plugin uses an 8-bit mask which can be used to produce transparent and translucent effects. The overlays and masks are designed by the user following easy, step-by-step instructions, and sample overlay files are included to help in the creation of original designs.

adding overlaid

graphics is as

easy as 1, 2, 3

Make sports cards with a few mouse clicks

photographic solutions

for the digital age

The Overlay Plugin for Packagizer makes compositing digital overlays easy and fast. Just select an image, select the overlay and a print package. You're done. Packagizer and the Overlay Plugin will do all the rest of the work automatically. You can go right to the next task, because, the compositing, scaling, formatting and printing will run in the background. You only have to pick up the finished prints. Packagizer, with the Overlay Plugin provides a powerful, easy to use, and flexible solution for photo labs, event photographers, and other photographic professionals.
