

PERFECT PROFILES ARE NOW AS EASY AS 1-2-3.

Getting perfect color from your photographs and vector art has never been simpler. Using the *New CompassProfile 2*, the industry's best ICC/ColorSync printer and scanner profiles can

be created in three easy steps. And while CompassProfile's new intuitive interface makes creating profiles "out of the box" easier than ever, its expert features enable any Color Guru to "tweak" them to their eyes' content.

CompassLink™

Technical Features:

- New intuitive interface for easy “out of the box” profiling—*no third party software required.*
- Create custom ICC/ColorSync profiles for both CMYK/RGB print devices and scanners.
- Expert tools for advance profile “tweaking” using hue shifts and Photoshop curves.
- Supports industry’s leading colorimeters and spectrophotometers including: X-Rite’s DTP-22, DTP-41 and DTP-51 and Gretag’s Spectrolino with Spectroscan table.
- Built-in target generation with flexible target formats and customized patch configurations—optimizing the measuring process for your output device.
- The industry’s only profiler with built-in support of the Flexographic Technical Association’s (FTA) flexography target.
- Import text documents generated by any industry colorimeter or spectrophotometer not directly supported for easy profiling.
- Profile non CMYK inksets, ideal for the packaging industry!

System Requirements:

- MacOS™ version 7.1 or later
- 4MB available on hard drive
- 8MB application RAM
- Power Macintosh or clone equivalent
- Colorimeter or Spectrophotometer (CompassProfile Printer), Scanner (CompassProfile Scanner)

The CompassLink™ suite of digital color management software includes: CompassProfile 2, CompassPro™ XT, CompassMaster™, ColorCompass™ 2, and CompassSwap™. Together they create a seamless workflow solution that ensures superior color consistency across all devices. Independently they offer a vast array of tools for color management and control.
