

ICC AutoFlow

ICC/COLORSYNC COLOR MANAGEMENT FOR ANY WORKFLOW.

Praxisoft's ICC Autoflow is a unique stand-alone application that applies ICC color management to any EPS file from applications such as Illustrator, Freehand and QuarkXPress, among others.

ICC AutoFlow's powerful engine also recognizes embedded images within EPS & Postscript files, and color manages those items as well. The result is complete color management of ALL your work.

ICC AUTOFLOW DELIVERS IMPROVED COLOR ON THE DESKTOP, OR REMOTELY.

ICC AutoFlow's flexibility doesn't end with file formats. Its unique architecture allows you to control it directly on your desktop, or remotely across your network via Hotfolders. This seamless integration into your workflow saves you valuable production time and increases your productivity.

ICC AutoFlow

ICC AutoFlow MAKES COLOR MANAGEMENT EASY FOR BOKLAND CUSTOM VISUALS.

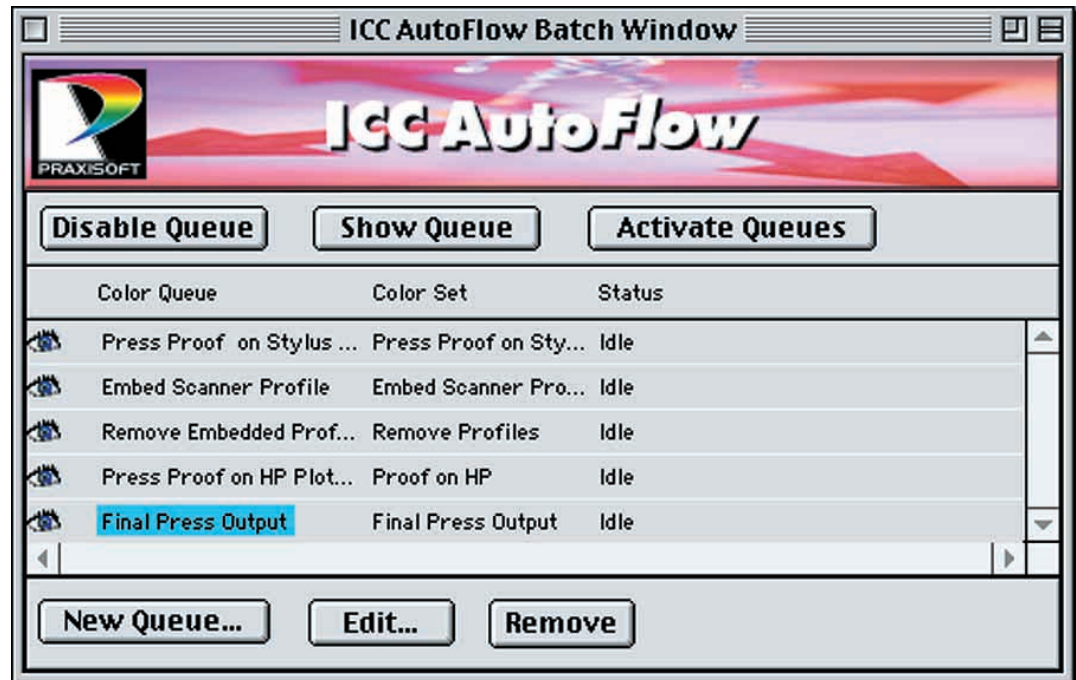

Bokland Custom Visuals owns all the products in the Praxisoft family and is constantly amazed, even after two years, how much time and money they have saved by using Praxisoft software to color manage their workflow. Praxisoft's ICC AutoFlow is no exception.

Bokland Custom Visuals does many profile to profile conversions in Photoshop for their Light Jet 5000. With ICC AutoFlow, they can do profile to profile conversions for scan to print without taking up time on their scanning workstation. The hot folders in ICC AutoFlow allow the conversion of TIFF as well as EPS in a totally automated fashion.

Mike Behan of Bokland says, "ICC AutoFlow has been a very important part in our labs' conversions from traditional photographic output to digital photographic output. The software is very easy to set up and use. This product would be a great asset in any color management workflow."

True color management accomplishes two things: 1. It accurately reproduces bitmap & vector color, and 2. it saves you time. But, it also has to work with all your applications. ICC AutoFlow is the only product that meets these requirements. The net result is you are more productive, and your customer is completely satisfied, because you are able to deliver more work, more accurately, in less time.

Technical Features:

- Accepts Postscript & EPS files from all major applications, including Adobe Illustrator and Photoshop, QuarkXPress, Macromedia Freehand and Multi-Ad Creator2.
- Accepts all types of Raster data, including TIFF (RGB and CMYK), JPEG (RGB and CMYK), EPS (RGB and CMYK), PICT and Postscript files.
- Recognizes embedded graphics within EPS and Postscript files, and color corrects those individual items.
- Accepts files from both Macintosh and Windows platforms.
- Can be operated on the desktop, or across your network via Hotfolders.

System Requirements:

MacOS version 7.0 or later, 3mb available on hard drive, 4mb application RAM, Macintosh 68020 or better - or any Power Macintosh or clone equivalent.
