SONY

UP-D8800 DIGITAL COLOR PRINTER

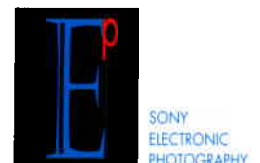

Sony's new Digital Color Printer, the UP-D8800, is a breakthrough in dye transfer sublimation thermal printing providing full letter sized printing for users in computer graphics design, photography, multimedia or video production, publishing, business, presentation and scientific applications.

The UP-D8800's new, enhanced architecture includes a 300 dpi thermal head that prints in approximately 80 seconds. For users who desire a quick print, the UP-D8800 provides a 150 dpi print in approximately 55 seconds. And the large print area covers up to full-bleed letter size printing on A4+ paper. Full network support via the new PostScript® Level 2 interpreter allows platform independence for Macintosh®, PC and UNIX® users.
